Forecast for Friday 01 Nov 2024

Weather: Largely overcast today with layer cloud trapped beneath a temperature inversion limiting cloud tops. This means that the highest summits, especially around Yr Wyddfa are likely to be above the cloud frequently through the day. Generally dry, but perhaps a few spots of drizzle on mid-level slopes. Winds easing with time.

Chance of cloud-free hill tops above 800m: 50%.

Low Cloud and visibility: Extensive cloud above 400-500m this morning, with tops to around 800-1000m. Bases may lift closer to 600-700m during the afternoon, with cloud tops similar. Very good visibility.

Freezing Level*	2600m	2500m	2500m	2500m	2400m	2400m	2300m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A settled start to November but persistent hill fog on mid-slopes may make navigation difficult.

Forecast for Saturday 02 Nov 2024

Weather: A similar day to Friday with extensive layer cloud trapped beneath a temperature inversion. A greater chance for more of the higher slopes to lie above the cloud layer. Meanwhile it will be largely overcast below this, with a chance of isolated drizzle. Mainly light winds.

Maximum wind: Southeast 15mph.

Chance of cloud-free hill tops above 800m: 60%.

Low Cloud and visibility: Extensive cloud above 400-500m in the early morning, with tops to around 700-900m. Bases lifting closer to 600-700m from late morning, with cloud tops similar. Very good visibility.

Temperature: **Valleys:** Plus 8C rising to 13 or 14C.
At 800m: Plus 5C rising to 8C.
Freezing level: Well above summits.
